WASDE - 578

Approved by the World Agricultural Outlook Board

June 12, 2018

Note: Because planting is still underway in the Northern Hemisphere and remains several months away in the Southern Hemisphere, these projections are highly tentative. National Agricultural Statistics Service (NASS) forecasts are used for U.S. winter wheat area, yield, and production. For other U.S. crops, methods used to project acreage and yield are noted on each table.

WHEAT: U.S. 2018/19 wheat supplies are increased slightly this month on higher beginning stocks and production. Winter wheat is forecast up 6 million bushels to 1,198 million with modest increases in all winter wheat classes and total wheat production is now at 1,827 million. U.S. exports are raised 25 million bushels to 950 million on tightening Russian exportable supplies. Projected 2018/19 ending stocks are lowered 9 million bushels to 946 million, down 12 percent from last year. The projected season-average farm price is up \$0.10 per bushel with the midpoint at \$5.10, compared to the revised 2017/18 price of \$4.75.

World 2018/19 wheat supplies decreased this month by 1.2 million tons on production declines in Russia, the EU, and Mexico not completely offset by higher projected production from India and the United States. Russia's production is lowered by 3.5 million tons to 68.5 million on drier-than-normal conditions this spring in winter wheat areas and excessive wetness in spring wheat regions lowering plantings. Russia's wheat production is projected down 19 percent from last year's record 85.0 million tons. EU wheat production is reduced 1.0 million tons to 149.4 million on dry conditions this spring for winter wheat in Germany and Poland. India's wheat production is raised 2.0 million tons to 97.0 million, based on record yields and supported by reports of higher procurement for the 2018/19 crop compared to last year.

Projected global 2018/19 trade is lower, mainly on reduced Russian exportable supplies with a smaller crop. Russia's exports are reduced 1.5 million tons to 35.0 million, but Russia still remains the world's leading wheat exporter. Global imports are lowered, mainly on reduced imports for India as the government recently raised its wheat import tariff. Projected 2018/19 world consumption is 3.0 million tons lower, primarily on reduced feed usage for Russia and the EU. Global ending stocks are raised 1.8 million tons this month to 266.2 million but are still below last year's record 272.4 million.

COARSE GRAINS: This month's 2018/19 U.S. corn outlook is for reduced beginning stocks, lower feed and residual use, greater corn used for ethanol production, and lower ending stocks. Beginning stocks are down largely reflecting a 75-million-bushel increase in projected exports for 2017/18 to 2.300 billion bushels, which if realized would be the highest since 2007/08. Exports during the month of April were record high, besting the prior monthly shipment record set in November 1989. Export inspection data for the month of May implies continued robust global demand for U.S. corn, while old crop outstanding sales at this point in the marketing year are record high. Projected 2018/19 corn used for ethanol is raised 50 million bushels, offsetting a 50-million-bushel reduction in food, seed, and industrial (FSI) use

of sorghum. Corn feed and residual use is lowered 25 million bushels with increased ethanol by-product production and higher expected prices. With supply falling and use rising, ending stocks are lowered 105 million bushels to 1.577 billion bushels, which if realized, would be the lowest level since 2013/14. The season-average farm price is raised 10 cents at the midpoint with a range of \$3.40 to \$4.40 per bushel.

The 2018/19 U.S. sorghum outlook is for a 50-million-bushel increase in forecast exports offset by reduced FSI use. Exports are raised reflecting expectations of China's demand for U.S. sorghum, based on the announcement by The Ministry of Commerce May 18 terminating the anti-dumping and subsidy investigation on imported sorghum originating from the United States.

This month's 2018/19 foreign coarse grain outlook is for lower production, reduced trade and lower stocks relative to last month. Russia corn production is down based on government data indicating lower-than-expected planted area. Barley production is reduced for Ukraine, India, and the EU, but raised for Argentina. For 2017/18, Brazil corn production is lowered, as below-normal rainfall in the Center-West and South during May reduces yield prospects for second-crop corn. Area is also reduced based on the latest government statistics.

Major global trade changes for 2018/19 include lower forecast corn exports for Russia, with reductions in corn imports for Vietnam, Iran, and Algeria. Foreign corn ending stocks are lowered from last month, mostly reflecting reductions for the EU, Brazil, and Vietnam that more than offset increases for Ukraine and South Africa.

RICE: U.S. 2017/18 rice ending stocks are raised 3.0 million cwt this month on a 1.0-million-cwt increase in imports and a 2.0-million-cwt decrease in exports. Both changes reflect the pace of trade to date. The import increase is primarily for long-grain aromatics from Asia. The entire export reduction was medium- and short-grain and is now projected at the lowest level in more than a decade. The 2017/18 season-average farm price for all rice is lowered \$0.10 per cwt at the midpoint to a range of \$12.30 to \$12.70. Total supplies for 2018/19 are raised 4.0 million cwt on increased beginning stocks and imports. Domestic and residual usage is raised 1.0 million cwt on larger supplies. Exports are raised 2.0 million cwt following the unusually low medium- and short-grain sales from the previous market year. Ending stocks for 2018/19 are raised 1.0 million cwt and prices are unchanged.

Global supplies for 2018/19 are lowered 2.1 million tons primarily on reduced China production. China's harvested area is decreased 0.5 million hectares and production is down 2.3 million tons. The reduced China supplies are accounted for by a 1.0-million-ton reduction in consumption and a 1.3-million-ton decrease in stocks. Global consumption is lowered 0.6 million tons and exports are raised fractionally. With reduced supplies more than offsetting lower use, global ending stocks are down 1.5 million tons.

OILSEEDS: This month's U.S. soybean supply and use projections for 2018/19 include lower beginning stocks, slightly higher crush, and lower ending stocks. Lower beginning stocks reflect higher crush for 2017/18. Soybean crush for 2017/18 is raised 25 million bushels to 2,015 million reflecting an increase in projected soybean meal domestic disappearance and exports. Higher soybean meal domestic disappearance reflects stronger-than-expected use for the marketing year through April. Soybean meal exports are raised based in part on commitments through May. Soybean ending stocks for 2017/18 are

projected at 505 million bushels, down 25 million from last month. Ending stocks for 2018/19 are projected at 385 million bushels, down 30 million from last month.

Price forecasts for 2018/19 are unchanged this month. The 2018/19 season-average price for soybeans is forecast at \$8.75 to \$11.25 per bushel; soybean meal and oil prices are projected at \$330 to \$370 per short ton and 29.5 to 33.5 cents per pound, respectively.

The 2018/19 global oilseed supply and demand forecasts include higher production, exports, and stocks compared to last month. Higher global soybean production is partly offset by lower rapeseed and cottonseed. Soybean production is up 0.7 million tons to 355.2 million mainly on higher production for Brazil. A higher trend yield for the 2018/19 Brazil soybean crop reflects harvest and yield results for the 2017/18 crop, which is increased 2 million tons to 119 million. With higher production, soybean exports for Brazil are revised up for both the 2017/18 and 2018/19 marketing years. Ending stocks for Brazil are also increased with higher production and a lower crush estimate for 2016/17.

Global 2018/19 soybean ending stocks are increased 0.3 million tons to 87.0 million with higher stocks for Brazil partly offset by lower stocks for the United States and Argentina. Stocks for Argentina are lowered mainly on a 2.0-million-ton reduction to the 2017/18 crop to 37 million. Other changes include lower EU rapeseed production which is reduced on lower yields for Germany and Poland, where crops experienced warm and dry weather conditions through key flowering stages.

SUGAR: U.S. sugar supply for 2018/19 is decreased 44,387 short tons, raw value (STRV) to 14,203 million on lower beginning stocks and lower cane sugar production. Cane sugar production in Texas is lowered by 20,000 STRV to 160,000 based on processor-reported lower area harvested but with the same crop yield and sucrose recovery as in the previous year. Imports for 2018/19 are unchanged and like last month, projected TRQ imports of specialty sugar include only the WTO minimum quantity as additional quantities have not been announced by the Secretary of Agriculture. Exports are increased by 35,000 STRV to 85,000 on larger expected shipments to Mexico.

U.S. sugar supply for 2017/18 is decreased 49,387 STRV on lower cane sugar production and fewer imports. Florida cane sugar production for 2017/18 is reduced 14,387 STRV on processors' estimates. Re-export imports are reduced 50,000 STRV. Partially offsetting this reduction is an increase in high-tier tariff imports as indicated in preliminary U.S. Customs import data. Deliveries for human consumption are reduced by 25,000 STRV based on pace-to-date, but this reduction is tempered by high raw sugar stocks held by cane refiners for this time of year.

In Mexico 2018/19 sugar imports are increased by 30,767 metric tons (MT) to 115,000. The end uses of these imports are forecast for human consumption and are projected to be imported from the United States.

LIVESTOCK, POULTRY, AND DAIRY: The 2018 forecast for total meat production is lowered from last month, but production forecasts are unchanged for 2019. Beef production for 2018 is lowered primarily as lighter carcass weights more than offset higher second-quarter steer and heifer and cow slaughter. Pork production for 2018 is lowered on the current pace of second-quarter slaughter and lower-expected commercial slaughter in the third quarter. Slightly

heavier expected hog carcass weights in the second and third quarters partially offset declines in slaughter. USDA's *Quarterly Hogs and Pigs* report will be released June 28th and will provide an indication of producer farrowing intentions for the remainder of 2018. Broiler production for 2018 is raised on the pace of second-quarter production data and stronger growth in production during the second half of the year. Turkey production in the second quarter of 2018 is raised on the current pace of slaughter; no changes are made to outlying quarters. Egg production for 2018 is raised on recent hatchery data.

The 2018 beef import forecast is raised on increased shipments from Oceania, while the beef export forecast is raised largely on strong Asian demand reflected in recent trade data. The 2018 pork export forecast is raised on continued strong shipments to a number of key markets and expectations of continued pork exports to Mexico. Pork exports for 2019 are raised on expected strong demand to a number of key trading partners. Second-half 2018 turkey export forecasts are raised as U.S. prices remain attractive. The 2018 broiler trade forecast is unchanged from the previous month. No changes are made to 2019 beef and poultry trade forecasts.

Cattle prices for 2018 are lowered slightly on second-quarter price data; no changes are made to outlying quarters. Hog prices are raised for the second quarter of 2018 on current price strength, but no changes are made to the outlying quarters. Second-quarter broiler prices are lowered for 2018; no changes are made to outlying quarters. Turkey prices are increased fractionally for 2018, reflecting a higher second-quarter forecast. Egg prices for 2018 are lowered on recent price data. For 2019, hog prices are lowered on weaker expected demand, but no changes are made to cattle, poultry, and egg price forecasts for 2019.

The milk production forecast for 2018 is reduced from last month on slightly lower cow numbers and slower expected growth in milk per cow. No change is made to the annual cow herd for 2019, but the milk production forecast for 2019 is lowered from last month on continued slow growth in milk per cow.

For 2018, fat basis exports are raised from the previous month as second-quarter exports are strong and continued strength in sales of a number of fat-containing products will largely mitigate the impacts of Mexico's tariffs on U.S. cheese. For 2019, the fat basis export forecast is lowered. Skim-solids basis export forecasts for 2018 and 2019 are raised from the previous month on robust demand for non-fat dry milk and lactose thus far in 2018, and this strength is expected to carry into 2019. Fat basis imports for 2018 and 2019 are raised on higher imports of butterfat products, while skim-solids basis import forecasts for 2018 and 2019 are reduced on lower imports of milk proteins and a number of other dairy products.

The 2018 cheese price is unchanged at the midpoint of the range, but is raised for 2019. The 2018 butter price forecast is raised, but is reduced slightly for 2019. Nonfat dry milk (NDM) and whey price forecasts are raised for both 2018 and 2019 on strong demand and a reduced production forecast. For 2018, the Class III price is raised on the stronger whey price. The Class IV price forecasts reflects higher butter and NDM prices. For 2019, both Class III and Class IV prices are raised. The all milk price is forecast higher at \$16.60 to \$17.00 per cwt for 2018 and is increased to \$16.70 to \$17.70 per cwt for 2019.

COTTON: The most significant revision to this month's U.S. cotton supply and demand estimates is a 500,000-bale increase in 2017/18 exports, to 16.0 million bales, due to above-

average late-season shipments. U.S. ending stocks are now forecast at 4.2 million bales in 2017/18, and 4.7 million bales in 2018/19, for a stocks-to-use ratio of 25 percent. The projected range of the marketing-year-average farm price is raised 5 cents at each end to 60-80 cents per pound.

The 2018/19 world projections include lower production for China, Pakistan, and Australia offset in part for higher production for Brazil. World production is nearly 800,000 bales lower this month, while 2018/19 consumption is reduced only 85,000 bales, as a 225,000-bale reduction for South Korea is largely offset by increases for Uzbekistan and Vietnam. World beginning stocks for 2018/19 are unchanged from a month earlier, but ending stocks are 725,000 bales lower. At 83.0 million bales, 2018/19 world ending stocks are projected 5.2 million bales lower than a year earlier, but stocks outside of China are expected to rise for the third consecutive year.

Approved by the Secretary of Agriculture and the Chairman of the World Agricultural Outlook Board, Seth D. Meyer, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

APPROVED BY:

ROBERT JOHANSSON
SECRETARY OF AGRICULTURE DESIGNATE

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

Note: The World Agricultural Outlook Board reviews and approves the World Agricultural Supply and Demand Estimates (WASDE) report. The Board's analysts chair the Interagency Commodity Estimates Committees (ICECs) that prepare the monthly report.

Note: Totals may not add due to rounding. 1/ Marketing year beginning June 1. 2/ Marketing-year weighted average price received by farmers. 3/ Includes imports. * Planted acres reported in the March 28, 2018, "Prospective Plantings."

Harvested acres and yield for other spring wheat and Durum are projected using 10-year harvested-to-planted ratios by state and 1985-2017 yield trends by state (except for Arizona, California, and Idaho Durum). For May, winter wheat harvested acres and yield reported in the May 10, 2018, "Crop Production." For June, winter wheat harvested acres and yield reported in the June 12, 2018, "Crop Production."

Wheat-by-class projections for 2018/19 will first be published in the July 12, 2018, WASDE.

Note: Totals may not add due to rounding. 1/ Marketing year beginning September 1 for corn and sorghum; June 1 for barley and oats. 2/ For a breakout of FSI corn uses, see Feed Outlook table 5 or access the data on the Web through the Feed Grains Database at www.ers.usda.gov/data-products/feed-grains-database.aspx. 3/ Corn processed in ethanol plants to produce ethanol and by-products including distillers' grains, corn gluten feed, corn gluten meal, and corn oil. 4/ Marketing-year weighted average price received by farmers. * Planted acres reported in the March 29, 2018, "Prospective Plantings." For corn, harvested acres projected based on historical abandonment and use for silage. The yield projection is based on a weather-adjusted trend assuming normal mid-May planting progress and summer growing season weather, estimated using the 1988-2017 time period, and includes a downward stochastic adjustment to account for the asymmetric response of yield to July precipitation. (For an explanation of the yield trend model see Westcott and Jewison, Weather Effects on Expected Corn and Soybean Yields, USDA-ERS, Feed Outlook No. (FDS-13G-01), July 2013, <https://www.ers.usda.gov/publications/pub-details/?pubid=36652>.)

California 10/	14.10	16.20 - 17.00	16.50 - 17.50	16.50 - 17.50
Other States 1/	10.10	11.90 - 12.10	11.20 - 12.20	11.20 - 12.20

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of ending stocks by type (in mil. cwt): 2015/16-2.9; 2016/17-3.5; 2017/18-3.5. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The medium/short-grain season-average-farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. For example, the average difference between the August WASDE SAFP forecast and the final price has averaged \$1.65 per cwt from 2008/09-2013/14, with a high of \$3.50 per cwt in 2008/09 and a low of \$0.60 per cwt in 2009/10. 10/ Marketing year beginning October 1. * Planted acres reported in March 29, 2018, "Prospective Plantings." Harvested acres are estimated using the average harvested-to-planted ratios by rice class, 2013-2017. Projected yield is based on by class trend analysis and prospective planting.

Avg. Price (\$/s.t.) 2/	316.88	360.00	330.00 - 370.00	330.00 - 370.00

Note: Totals may not add due to rounding. Reliability calculations at end of report. 1/ Marketing year beginning September 1 for soybeans; October 1 for soybean oil and soybean meal. 2/ Prices: soybeans, marketing year weighted average price received by farmers; oil, simple average of crude soybean oil, Decatur; meal, simple average of 48 percent protein, Decatur. 3/ Reflects only biodiesel made from methyl ester as reported by the U.S. Energy Information Administration. 4/ Based on an October year crush of 2,015 million bushels for 2017/18 and 2,000 million bushels for 2018/19. *Planted acres are reported in the March 29, 2018 Prospective Plantings report. Harvested acres are based on the 5-year planted-to-harvested ratio. The projected yield is based on a weather-adjusted trend model and assumes normal weather.

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and European Union. 4/ China, India, and North Africa. 5/ Algeria, Egypt, Morocco, and Tunisia.

1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Reliability of June Projections 1/

Note: Tables on pages 35-37 present a record of the June projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 3.1 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 5.3 percent. The average difference between the June projection and the final estimate is 16.4 million tons, ranging from 0.4 million to 32.2 million tons. The June projection has been below the estimate 24 times and above 13 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2017/18 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2016/17, and for 2017/18 the last month's estimate. Calendar years 1982 through 2017 for meats, eggs, and milk. Final for animal products is defined as the latest annual production estimate published by NASS for 1982-2017.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <https://apps.fas.usda.gov/psdonline/app/index.html>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of the Foreign Agricultural Service. PECAD is located at www.pecad.fas.usda.gov/.

Metric Conversion Factors

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720

WASDE Notification System

Subscribers are notified through GovDelivery when the monthly *World Agricultural Supply and Demand Estimates (WASDE)* report is available.

Previous *WASDE* reports are available at
